

## We Empower People to Seamlessly and Safely Adopt Crypto Assets into their Lives.

All personal data remains on the card. Only you can activate the card with your fingerprint. Using a UKey card to store crypto assets is the simplest and most secure way to interact with blockchain powered ecosystems. The UKey card solves the problems of usability and transportability of the current hardware wallets.

## Our Commitment

---

The Unikeys team has spent a consequent amount of time to test and build highly advanced products and solutions to **increase security and user experience** for the blockchain community, merchants and the enterprise world.

The real value of efficiency is to create new opportunities and make things that were previously cumbersome and unthinkable possible. **The “One for all and all in one” solution** is giving Unikeys a unique advantage to take an active role in driving blockchain and crypto assets standards forward.

**10%** of the global GDP will be stored on blockchain technology.

**84%** of executives reported having blockchain projects in progress.

**USD 25 billion**  
Global Biometric Market by 2020.

**1 billion** users of biometrics-enabled devices for financial services by 2020.

# A Unique Combination of Feature that Makes the UKey Card the Most Versatile Card on the Market.

**Format**  
ISO 17839  
ISO 7810 ID-1 bank card format

**Operational temperature**  
-10°C to 50°C

**RFID Frequencies**  
13.56 MHz

**Contactless Protocols**  
ISO 14443

**Contact Protocols**  
ISO 7816

**MoC Algorithm**  
Precise Biometrics & On Demand

**Reading System**  
Touch fingerprint sensors

**OS**  
Global Platform

**Certification**  
EMV Co & EAL 6+

**Autonomy**  
> 4000 uses

## Crypto Assets For All

### Enabling a Blockchain Powered World.

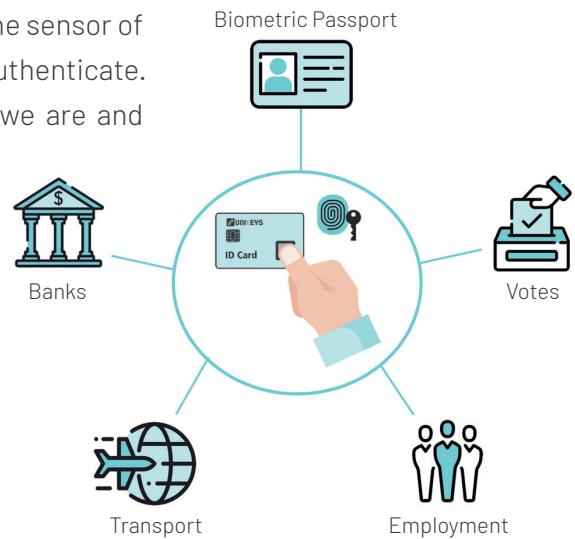

Building bridges between crypto assets and traditional networks is essential to generate a streamline adoption. Unikeys is reinforcing and encouraging the adoption of crypto assets for individuals, SMEs, large enterprises, NGOs and governments willing to rely on blockchain technology.

## Augmented Social & Financial Inclusions

Proving who we are has never been this easy. Place your finger on the sensor of the UKey card and tap it on a reader/smartphone to biometrically authenticate. With the UKey card, it becomes possible to securely prove who we are and simply utilise our identity to:

- Open or close a bank account
- Register at a school or university
- Obtain a phone number
- Apply for or renewing a driver's license
- Apply for a travel document
- Apply for any social services or grants
- Register to vote, and vote in elections
